Western Specialty Contractors Opening Commercial Roofing Branch in Kansas City, MO

(St. Louis, MO, March 14, 2017) Western Specialty Contractors is expanding its commercial service offerings in Kansas City, MO with the opening of a new Kansas City Roofing branch in the spring.

The new roofing branch will offer maintenance, repair and replacement of commercial flat roofs and will be located in Western's existing Kansas City branch office at 800 North Agnes Avenue. The existing branch, serving Kansas and Western Missouri since 1945, provides the following services: building cleaning, concrete restoration, epoxy and chemical grout injection, expansion joint systems, exterior wall coatings, masonry restoration, parking and plaza deck restoration and waterproofing.

Keegan Tune, who has been selected as Branch Manager of the Kansas City Roofing branch, says the added services will allow Western to better serve its existing clientele in the Kansas City market, as well as attract new customers. Expanding Western's roofing expertise into Kansas City will make Western a single source contractor for remediation of any water intrusion problems that a structure will encounter throughout its lifespan, he said.

"The Kansas City market is currently experiencing some very strong growth, and it's a market where Western has enjoyed a loyal and robust customer base," said Tune. "Adding a roofing service makes Western a full-service, building envelope restoration contractor."

Western currently has over 30 branch offices nationwide. The last time Western opened a new branch was in 2008 in San Antonio, TX. That same year, Western also opened a branch in Peoria, IL after acquiring Peoria Roofing & Restoration Company.
